How Sygic Job Dispatch helps merchandising companies?

Ever since the Company GOODs started using Job Dispatch, everything works just fine. Now it's easy to have all operations and employees in the field under control. Job Dispatch gives you not only the overview of all jobs and visited places in real time, but also their complete history.

1. The dispatcher schedules a list of tasks each merchandiser should do and sends it to their Job Dispatch application.

2. Each merchandiser receives a list of tasks divided by days of the week. This list of tasks for the whole week is saved on each merchandiser's phone.

3. When a merchandiser gets to the delivery destination, he checks the goods. If any items are lacking, he can take a photo as a proof.

4. The merchandiser unloads the goods and checks the inventory. As each task is done, he records the progress in the Job Dispatch application on his mobile.

5. This information is immediately available to the dispatcher. He sees the up-to-the-minute status of tasks and can respond flexibly to different situations.

6. At any time of the week the dispatcher can access the complete report and history of the jobs. Job Dispatch provides him with information about visited places, time spent and possible issues. This information makes it easy to schedule the tasks for the next week.

There are many other ways in which you can use Job Dispatch for your business and easily manage your entire mobile workforce. For more info visit sygic.com/jobdispatch
